

**2010 Joint Committee of Engineering Societies
Excellence in Teaching Awards**

NHSPE is pleased to announce that this spring; three extremely deserving individuals were awarded by the NH Joint Committee of Engineering Societies with the Excellence in Teaching Awards at the Elementary, Middle and High School levels. The Joint Committee was comprised of NHSPE, ASCE-NH, SENH, NH Institute of Transportation Engineers, IEEE-NH, ACEC-NH, SWE-NH, as well as the NH Professional Engineers Board, the NH Teachers of Mathematics and the NH Science Teachers Association.

Applications were received from December to March, and the three winners were notified in April after review by the committee. In May, we will have the distinct pleasure of visiting each teacher in their school environment to present their awards to them in front of their colleagues and students. The winners this year were as follows:

Elementary School – Mr. Derek Pappaceno, Alton Central School.

Middle School - Ms. Helen Steer, St. Josephs Regional Jr. High School, Manchester.

High School – Dr. Angela Lennox – Exeter High School.

Each winner will be presented with a plaque and \$250.00 stipend. We are very excited about this program going forward, and hope to build on the success in 2011.
